

Life Science — Cells & Energy Quiz

CC0 1.0 synthetic fixture · Kelyra QA · not real student work

Period P2 · Student page 1/32 · simulated handwriting

Name: Alex Rivera

Date: 09/24/2026

1. Which organelle is often called the powerhouse of the cell?

mitochondria

2. Plant cells make food using sunlight in a process called ____.

photosynthesis

3. True/False: Animal cells have a cell wall.

Falsz

4. Name the jelly-like material that fills most of a cell.

cytoplasm

5. On the plant-cell diagram, label A–D (nucleus, chloroplast, vacuole, cell wall).

A nucleus; B chloroplast; C vacuole; D cell wall

6. What gas do plants release during photosynthesis?

oxygen

7. DNA is stored mainly in which organelle?

nucleus

8. One sentence: why do cells need energy?

Cells need energy to grow, repair, and carry out life processes.

CC0 1.0 synthetic fixture · Kelyra QA · not real student work

Period P2 · Student page 2/32 · simulated handwriting

Name: Jordan Chen

Date: 09/24/2026

1. Which organelle is often called the powerhouse of the cell?
chloroplast
2. Plant cells make food using sunlight in a process called _____.
photosynthesis
3. True/False: Animal cells have a cell wall.
False
4. Name the jelly-like material that fills most of a cell.
cytoplasm
5. On the plant-cell diagram, label A–D (nucleus, chloroplast, vacuole, cell wall).
A nucleus; B chloroplast; C vacuole; D cell wall
6. What gas do plants release during photosynthesis?
oxygen
7. DNA is stored mainly in which organelle?
nucleus
8. One sentence: why do cells need energy?
cells need energy to grow, repair, and carry out life processes.
