Source: dated research digests under notes/company · graphics illustrate locked recommendations.

Executive recommendation

Locked recommendation

Hybrid essential metric set: teacher gradebook charts from existing data (missing/late, completion, histograms, at-risk, Needs age) plus admin adoption / at-risk / Ride / AI burn. Refuse vanity engagement and fake growth percentiles. Approve-only scores; parent = own child only.

Decision cards

Pick Hybrid essential	Teachers Ops charts P0
Admins At-risk + adoption	Refuse Vanity metrics

Hybrid essential set — actionable ops over vanity

Full SIS BI No	Vanity engagement No	Native MAP/Star No	Hybrid essential Yes
--------------------------------------	--	--	--

Figure: Approach pick vs alternatives.

Learning & Education Analytics — Research Digest

Date: 2026-09-24 Author: Chief of Staff / Grok Bot (Kelyra) Status: Ready for Chuck review SoT pair: [notes/company/learning-analytics-research.md](#) · [notes/company/learning-analytics-plan.md](#) Card: [t_58a377ea](#) Access date for all URLs: 2026-09-24 (America/Chicago)

This dated file is a readable pack for Chuck. Full detail lives in the SoT pair above. Research + recommendation only — no app implementation. No Hermes AI staffing.

Not legal advice. Cross-link FERPA: [notes/company/ferpa-compliance-plan.md](#).

Recommendation (pick)

Best approach for Spring Baptist: Hybrid essential set

Approach	Verdict
Full SIS BI / Tableau warehouse day one	No — overkill; BrightBytes-class distraction
LMS vanity engagement (page views) first	No — no instrumentation; weak Monday action
Assessment growth (MAP/Star-style) native	No — those vendors own norms; import later
Hybrid = teacher gradebook charts from existing data → office adoption/at-risk/Ride/AI → advanced later	Yes — choose this

Locked recommendation bullets

- Teachers (P0): missing/late rates; completion & on-time %; grade histogram; class/category average trends; at-risk flags; Needs queue age.
- Admins (P0/P1): at-risk counts; pass/D–F rollups; grade distributions by class (culture-safe); adoption; Ride ops; AI credit burn.
- Defer: standards heatmaps, item analysis, attendance charts, equity subgroups, BI export, page-view engagement.
- Prefer actionable ops over vanity. Approve-only scores. Parent = own child only.

Recommended essential metric / chart set

Teachers

Teachers P0	Admins P0/P1
Missing/late	At-risk counts
Completion %	D-F rollups
Grade histogram	Distributions
Category trends	Adoption
At-risk flags	Ride health
Needs age	AI burn

Figure: Teacher vs admin essential set.

- Missing / late / incomplete — stacked bar + student list
- Completion % & on-time % — bullet / bar
- Grade distribution — histogram
- Class average over time + category averages — line / grouped bar
- At-risk roster — badges + table
- Needs / Approve queue age — age histogram + P50/P90

Admins / office

- At-risk student count — tile + roster
- Course fail / D-F rate — bullet vs goal
- Grade distribution by class — stacked bar (support framing)
- Adoption — teachers active, parents linked, classes grading
- Ride dismissal health — status + match/fail summary
- AI credit burn — remaining + burn (AICRED)

Charts to refuse

- 3D pie; vanity engagement composites; peer ranks for parents; fake growth percentiles from homework.

Top 5 implementation priorities

Charts to refuse

Figure: Charts to refuse.

- 1. Teacher Insights from existing gradebook (missing, completion, histogram, trends).
- 2. At-risk flags with simple thresholds + deep-link to Needs/student.
- 3. Needs queue age (Kelyra-native differentiator).
- 4. Office Analytics tiles: at-risk + adoption + Ride + AI burn.
- 5. Hat walls / Approve-only / n-threshold before any export or subgroup idea.

Coverage map

Topic	Research \$	Plan \$
Industry landscape	Research \$1	—
Teacher metrics	Research \$2	Plan \$2 N1–N7
Admin metrics	Research \$3	Plan \$2 N8–N11
Chart grammar	Research \$4	Plan \$0
FERPA / hats	Research \$5	Plan \$0, N12–N13
Data readiness	Research \$6	Plan \$4
Competitor table	Research \$7	—
Phased roadmap	Research \$8	Plan \$3
Open questions	—	Plan \$6
Acceptance	—	Plan \$7

Phase snapshot

Phase	Ship
P0 Teacher Insights	Missing, completion, histogram, trends, at-risk, Needs age — own class
P1 Office Analytics	School tiles, adoption, Ride, AI burn, optional by-class distribution, parent sparkline, events sketch, CSV
P2 Advanced	Standards heatmaps, item analysis, attendance, equity+n-gates, BI export

Risks

Risk	Mitigation
FERPA / disclosure	Role hats; Approve-only; n-thresholds; no parent peer charts; link FERPA plan — not legal advice
Teacher surveillance culture	Self-first Insights; office by-teacher charts optional + support framing
Vanity metrics	No page-view charts in P0; every chart needs a Monday action
Fake growth	Do not invent MAP-like percentiles from homework
Attendance gap	Explicit non-goal until attendance product exists

Figure: Rollout phases.

Open questions for Chuck

- 1. At-risk thresholds (70 / 3 missing / 15pt-14d)?
- 2. Office by-teacher distributions in P1?
- 3. Aggregation n=5 vs 10?
- 4. Parent sparkline timing?
- 5. Needs age visible to office?
