Executive recommendation

Locked recommendation

First-class lesson_plans records with Cognia/ACSI-aligned fields, templates + AI draft (confirm-before-publish), calendar span join by reference, private diary link, day-of run-of-show, and fail-closed optional parent summary — separate from Author HTML packs.

Decision cards

Core lesson_plans record	AI Confirm before publish
Join Calendar span ref	Parents Summary fail-closed

Figure: N1-N9 Top P0 recommendations.

Lesson plans (accreditation) — Research + Recommended Features Digest (R2)

Date: 2026-09-24 Author: Chief of Staff / Grok Bot (Kelyra) Status: Ready for Chuck review SoT pair: [notes/company/lesson-plan-research.md](#) · [notes/company/lesson-plan-plan.md](#) Also keep (unchanged architecture/security/acceptance unless noted): sibling [*-architecture.md](#) / [*-security.md](#) / [*-acceptance.md](#)

This dated file is a readable pack for Chuck. Full detail lives in the SoT pair above.

Top 5 P0 recommendations

1. N1/N2 — First-class [lesson_plans](#) record with Cognia/ACSI-aligned core fields + draft→publish→archive (separate from Author [publish_lesson_pack](#) HTML packs).
2. N3/N4 — Templates + copy-forward + AI draft with confirm-before-publish.
3. N5 — Calendar span join for published plans (reference, no body duplication).
4. N6/N7 — Diary link only (private); day-of run-of-show UI for teachers.
5. N8/N9 — Parent summary optional fail-closed; taught-class teacher author only.

Research (full SoT)

Lesson Plan Research Note (LPLAN-R2)

Date: 2026-09-24 Author: Chief of Staff / Grok Bot (Kelyra) Status: Ready for Chuck review Revision: R2 (supersedes LPLAN-R1 / 2026-09-03) Cards: Epic [t_4d69845a](#) Access date for URLs: 2026-09-24 (America/Chicago)

Related: Calendar [calendar-research.md](#) · Class landing [class-landing-research.md](#) · Diary epic (join only; do not rebuild) Not this product: Author studio / [publish_lesson_pack](#) HTML lesson packs — separate path; plans may link a pack id, never store pack HTML.

Executive summary

Accreditation lesson plans are teacher-owned working records + day-of run-of-show + evidence of instructional design, not student-facing HTML packs and not Diary prose.

For Spring Baptist-like private Christian schools, Cognia Essential Requirement 7 (2026) and ACSI Inspire Standards 7–8 set the bar: documented curriculum/instructional design + assessment/monitoring plan; biblical worldview integration where ACSI applies. Texas private schools are not TEA public-school curriculum-mandate clones — variance is high; Cognia/ACSI evidence culture matters more than TEKS binders.

Answers to CEO questions (short):

1. Calendar span? Yes — join a published plan to a dated/period span on Calendar; do not duplicate body.
2. Execution diary? Separate Diary epic; optional [related_plan_id](#) link; diary stays owner-only (not accreditation evidence).
3. Day-of teacher use? Run-of-show mode (timing, materials, checks) on phone/web; not grade Approve.
4. Parents? Fail-closed; optional summary share only (objectives/overview) — never full procedures/differentiation/internal notes.

v1 cut: Core fields + templates + copy-forward + AI draft (confirm-before-publish) + calendar join + diary link + fail-closed parent summary + taught-class teacher author only.

1. Accreditation & private-school context

1.1 Cognia (2026 Essential Requirements)

Essential Requirement 7: institution maintains a documented educational program, including curriculum or instructional design, guiding teaching and learning, supported by a plan for assessing and monitoring student learning. Evaluated yes/no with evidence at Entry. Source: Essential Requirements for Initial Accreditation (PDF, Cognia 2026). Accessed 2026-09-24 (America/Chicago).

Performance Standards (continuing) emphasize aligned curriculum/instruction, monitoring/adjusting instruction, program evaluation — evidence should show analysis and improvement, not binder dumps (Cognia evidence guidance pattern). Source: Cognia Performance Standards overview. Accessed 2026-09-24 (America/Chicago).

1.2 ACSI Inspire (Christian schools)

Standard 7 Instructional Program: biblically based instructional program; varied strategies; Bible as core. Standard 8 Curriculum Planning: comprehensive curriculum documentation; alignment of standards, objectives, activities, assessments; collaborative regular update. Sources: ACSI Inspire standards materials (e.g. ACSI standards checklist PDF; REACH/Inspire manuals). Accessed 2026-09-24 (America/Chicago). Flag: confirm Spring Baptist's exact agency (Cognia and/or ACSI) with Chuck — do not assume.

1.3 Texas private variance

TEA heavily shapes public TEKS alignment/documentation. Private schools accredited via Cognia/ACSI/other associations set their own documented programs. Kelyra should support standards fields that accept TEKS or school-selected / biblical-integration tags without hard-coding "TEA lesson plan form." Unverified: Spring Baptist's current binder template — ask Chuck.

2. Competitor patterns (copy vs skip)

Product	Strength	Copy	Skip
Planbook	Schedules (weekly/cycle/alt), standards frameworks, bump/copy year, attachments, school year calendars	Templates, bump/copy-forward, standards pickers, school calendar overlay	Full gradebook/attendance clone inside plans
Common Planner (Common Curriculum lineage)	Units + lessons, standards track, drag/bump, admin dashboard, school templates, AI assist	Admin view of published plans later; school templates; calendars in planbook	Forcing office authoring in v1
Chalk / Planboard / PowerSchool C&I	Calendar-centric planning, submission/review	Calendar span join; optional coach comment later	Heavy district workflow in v1
Canvas Modules	Student-facing sequence + dues	Link assignments from plan	Treating modules as accreditation plan record
Google Classroom	Draft/scheduled hide	Publish gate	Thin plans = Docs attachments only
AI tools (Monsha, Lessn, etc.)	Draft <60s from topic/standards	AI draft + teacher edit	Auto-publish; student PII in prompts

Sources: Planbook; Common Planner; Planbook vs Common Planner comparisons (secondary). Accessed 2026-09-24 (America/Chicago). User-count marketing claims (e.g. "300k teachers") treated as vendor marketing — unverified.

3. Plan vs Author lesson packs (explicit)

	Accreditation lesson plan	Author lesson pack (...)
Audience	Teacher (+ optional office review; optional parent summary)	Students (interactive HTML)
Job	Record + run-of-show + accreditation evidence	Practice / instruction player
Storage	lesson_plans (proposed entity – architecture SoT)	lesson_packs live catalog
Calendar	Span join when published	Appears via assignment due when published
Join	Plan may link deck_id+version	Pack never embeds plan prose

Accreditation bar — Cognia ER7 + ACSI Inspire 7-8

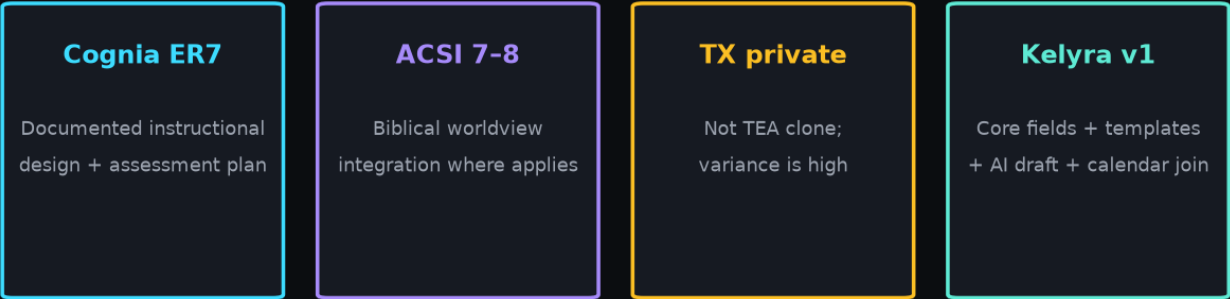

Figure: Cognia / ACSI / TX private context.

Law: Do not conflate. Do not store pack HTML on the plan row. Do not freeze or rewrite `publish_lesson_pack` in this epic.

4. Required fields / artifacts

Field	Needed v1	Accreditation why
Title + class_id	Yes	Anchors to taught class only
Objectives / learning goals	Yes	Cognia ER7 instructional design
Standards / biblical integration tags	Yes (flexible vocab)	Cognia/ACSI alignment evidence
Materials / resources	Yes	Day-of + sub
Procedures / activities + timing	Yes	Run-of-show
Assessment / checks for understanding	Yes	ER7 monitoring plan
Differentiation / accommodations	Yes	Whole-child / IEP-aware practice
Status draft\	published\	archived
Span start/end or period	Optional but joinable	Calendar
Reflection / what worked	Short teacher-only notes optional; Diary for deep reflection	Continuous improvement without leaking diary
Evidence export	Desired later	Cognia review packets

5. CEO questions — full answers

(1) Calendar span?

Yes, by join. Published plan references a span on Calendar (period/day/multi-day). Draft plans do not appear on student/parent calendars. Canonical body stays on `lesson_plans`; calendar row stores `source=lesson_plan` + id. Matches CAL hybrid SoT (no duplicated essay on the event).

(2) Execution diary join?

Join, do not merge. Diary epic remains private STT/notes (“what worked”). Optional `related_plan_id`. Accreditation evidence = plan + (later) ledger/taught markers — not private diary contents. Never show diary to parents/office/Al firehose.

(3) Day-of teacher use?

Run-of-show surface: open published plan → timing strip, materials checklist, activity steps, quick checks. Phone-first during class; web for prep. No grade Approve from plan. Sub view = published + materials (export/print P1).

(4) What goes to parents?

Fail-closed. Default: nothing. Optional teacher Share summary: title, objectives, high-level overview, dates — not full procedures, differentiation notes, assessments keys, or diary. Twin wall: summary only for enrolled child.

6. Additional product questions (invented)

1. Unit bank vs single-day plans — both? (Recommend: unit container P1; day plans v1.)
2. Co-teacher edit? (Park v1; single owner.)
3. Office comment on published plans for Cognia? (P1 if Chuck requires.)
4. Specials (PE/Art/Music) lighter template? (Yes — template pack.)
5. Bible integration required field for ACSI schools vs optional toggle per school? (Ask Chuck.)
6. Al may read syllabus/unit text — never roster PII. Confirm.
7. Substitute access mechanism (cover flag vs PDF export)?
8. Standards vocabulary source (TEKS pack vs school custom vs biblical tags)?
9. Link to class landing “daily focus” — blurb from plan summary only?
10. Archival retention for accreditation cycles (years)?

7. Hats & visibility

Hat	v1
Teacher (taught class)	Create/edit/publish; Al draft; calendar join; optional parent summary; diary link
Substitute	Read published + materials (when cover scope exists)
Office	None author; optional later read/comment on published
Parent	Summary only if shared; twin-safe
Student	No plan body v1 (work via assignments/landing)

8. AI features & safety

- Draft from topic / unit / standards / syllabus excerpt → teacher edits → explicit Publish.

- Suggest timing, materials list, standards tags, differentiation ideas.
- Confirm-before-publish. No auto-publish. No superuser Ask. No student names/grades in prompts.
- NL “schedule this plan Thursday period 2” → calendar draft join → confirm.

9. Mobile vs web

	Mobile	Web
Authoring	Short edits; dictate notes; day-of run-of-show	Full form; unit layout; AI draft review
Calendar join	Pick span sheet	Drag/span on week
Sub/print	Share sheet / PDF later	Print-friendly

lesson_plans lifecycle (separate from Author HTML packs)

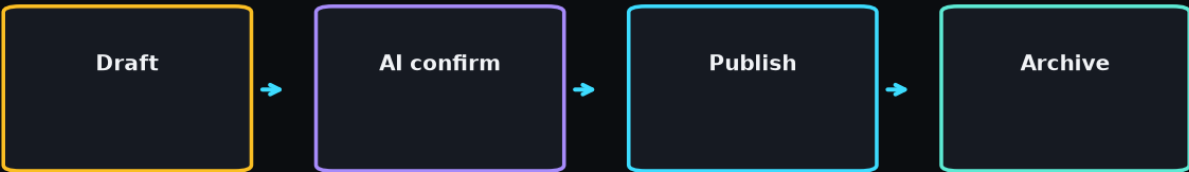

Figure: Draft → AI confirm → Publish → Archive.

10. Needed vs Desired

Needed P0	Desired P1-P2
Core fields + draft/publish	Office dashboard
Templates + copy-forward	Full evidence export pack
AI draft + confirm	Co-teacher collab
Calendar span join	Auto sub packet
Diary link (not embed)	Parent rich newsletter from plans
Fail-closed parent summary	Biblical-integration rubric library

11. Unverified flags

- Spring Baptist’s exact accreditor + current lesson plan template — ask Chuck.
- Vendor user-count claims — marketing.
- Whether Cognia reviewers accept digital plan systems without PDF binders — generally yes if documented + assessable; confirm with school’s Cognia liaison.
- TEA private-school myths — avoid inventing statutory duties.

12. Open questions for Chuck

1. Cognia, ACSI, both, or other for Spring Baptist archetype?
2. Bible integration field required or school toggle?
3. Office read/comment in v1 or park?
4. Confirm Author packs stay separate with link-only.
5. Priority vs Calendar P0 NL — sequence?

RECOMMENDED NEXT ACTION: Review with [lesson-plan-plan.md](#); keep architecture/security/acceptance; Eng only on later send.

Plan / recommended features (full SoT)

Lesson Plan Plan (LPLAN-P2 / R2)

Date: 2026-09-24 Author: Chief of Staff / Grok Bot (Kelyra) Status: Ready for Chuck review Revision: R2 (upgrades LPLAN-P1 2026-09-03) Research: [notes/company/lesson-plan-research.md](#) Keep: [lesson-plan-architecture.md](#), [lesson-plan-security.md](#), [lesson-plan-acceptance.md](#) (still fit — update cross-links only). Stack: Expo + Supabase + Edge AI. No app/SQL from this card.

0. Product law

Surface	Job	Not
Lesson plan	Teacher-owned accreditation working record + day-of run-of-show	Not Author HTML packs; not Diary; not Feed; not gradebook
Calendar join	Published plan occupies a dated/period span by reference	Not duplicated event body; drafts invisible to families
Diary join	Optional link to private “what worked”	Not embedding diary; diary not accreditation evidence
AI draft	Draft from topic/unit/standards → edit → explicit Publish	Not auto-publish; not Ask-as-superuser; no roster PII in prompts
Parent share	Optional high-level summary only	Not full procedures / differentiation / keys

Teachers write for taught classes only. Teachers do not create classes.

1. Explicit non-goals

Non-goal	Why
Class create from plan/Ask	Office owns directory
Auto-publish AI	Confirm / Publish only
Parent/student full body v1	FERPA fail-closed
Diary text on plan row	Diary epic
Duplicate calendar blobs	CAL join
Rebuild Author / publish_lesson_pack	Separate; link only
Office authoring v1	Teacher writes
Widen is_staff / twin merge	Hard law
Grade Approve from plan	Desk loop stays
Public unauthenticated plan URL	Signed-in only
SQL/app from this card	Research epic

2. Needed vs Desired

Needed (P0)

ID	Capability	Rationale
N1	Entity with core fields (title, class, objectives, standards/integration tags, materials, procedures+timing, a...	Cognia ER7 / ACSI Std 8
N2	draft → published → archived	Publish gate
N3	Templates + copy-forward / bump	Planbook / Common Planner speed
N4	AI draft + teacher confirm before publish	CEO easy-create
N5	Calendar span join when published	CEO Q1
N6	Diary optional link	CEO Q2; not merge
N7	Day-of run-of-show UI	CEO Q3
N8	Parent summary share optional, default off	CEO Q4
N9	Taught-class teacher author only; RLS fail-closed	Hats
N10	Explicit separation from Author packs (link optional)	Anti-conflation

Desired (P1–P2)

ID	Capability	Pri
D1	Office read/comment on published	P1 if accreditation needs
D2	Sub cover scope + print/PDF packet	P1
D3	Unit containers + standards coverage report	P1
D4	Evidence export for Cognia visit	P2
D5	Co-teacher edit	P2
D6	Landing “daily focus” pull from shared summary	P1 join
D7	School-wide template library	P1
D8	Biblical-integration helper library	P1 if ACSI

Join model — reference, no body duplication

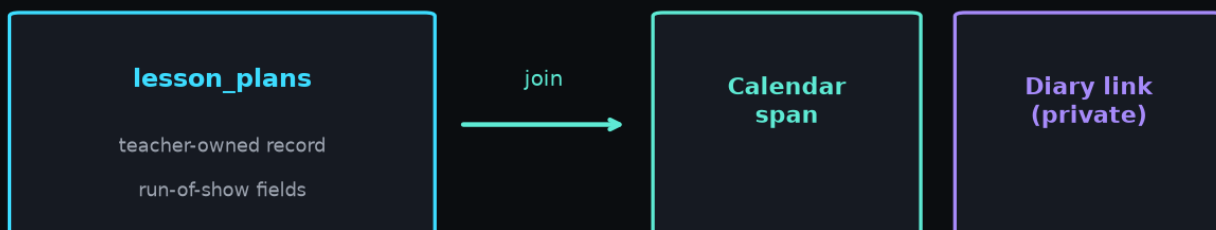

Figure: Plan ↔ Calendar ↔ Diary join model.

3. Hats — stories (v1)

Teacher: Create (blank/template/copy/AI); edit draft; Publish; attach calendar span or leave in library; day-of run-of-show; Reflect → Diary link; optional Share summary; optional link assignment/pack by id. Substitute: Read published + materials when cover scope exists (else PDF P1). Office: No author v1; parked read/comment. Parent: Fail-closed; summary only if shared + child enrolled; twin wall. Student: No plan body v1.

4. Field set (v1)

Field	Req	Notes
title	Y	
class_id	Y	Taught only; AI never invents
status	Y	draft \
objectives	Y	
standards_tags	Y	Flexible (TEKS / school / biblical)
materials	Y	
procedures_timed	Y	Steps + minutes
assessment_plan	Y	Formative/summative / CFU
differentiation	Y	
span_start / span_end / period	N	Required only for calendar join
teacher_notes	N	Teacher-only short notes (≠ Diary)
parent_summary	N	Used only when Share
linked_assignment_ids	N	References
linked_pack_ref	N	deck_id+version; no HTML
related_diary_id	N	Soft link

5. UI/UX

Web (prep)

- Plan library by class/unit; editor form with sections; AI draft panel → diff → Apply to draft; Publish bar; “Add to calendar” span picker; Share summary modal.

Mobile (day-of)

- Today’s plans list; Run-of-show: big timing, materials check, step cards; overflow → full editor; Reflect opens Diary.

Parent

- If shared: card on class landing / messages — objectives + overview only.

6. AI usage

Move	Allowed	Forbidden
Draft plan from topic/unit/standards/syllabus text	Y	Auto-publish
Suggest timing / materials / tags	Y	Roster PII in prompt
NL “schedule on Thursday P2”	Draft calendar join	Silent schedule
Rewrite parent_summary	Y with confirm	Invent full plan share

Confirm-before-publish everywhere. No superuser Ask.

7. Implementation approach (pointer only)

Per [lesson-plan-architecture.md](#) / [lesson-plan-security.md](#):

1. New `lesson_plans` (+ optional links table) — not overload `assignments` or `lesson_packs`.
2. RLS: owner teacher via `class_teacher_of` (not office `teaches_class` bypass for family reads).
3. Calendar: on publish+span, upsert calendar projection row with `source_type=lesson_plan` — body stays on plan.
4. Diary: nullable FK / soft id; no diary RLS widen.
5. Ask tools: `lesson_plan_draft` / `lesson_plan_schedule` under new caps — not `assignments.manage`.
6. Author packs: store link fields only; never call `publish_lesson_pack` from plan publish.
7. Expo screens: library, editor, run-of-show; Edge AI for draft.
8. Phases: fields+CRUD+templates → AI draft → calendar join → parent summary → diary link → (later) office/sub/export.

Gate: Chuck send required before Eng. Acceptance plan already written — still PLAN ONLY.

8. Cross-links

- Research R2, architecture, security, acceptance (keep)
- `calendar-plan.md` P1-2 join
- `class-landing-plan.md` daily focus from summary
- Diary epic: link only

9. Open questions for Chuck

1. Accreditor (Cognia / ACSI / both)?
2. Bible integration required field?
3. Office read in v1?

4. Confirm packs stay separate.

5. Build sequence vs Calendar NL P0?

RECOMMENDED NEXT ACTION: Chuck review; staff Eng only after send on a future build epic.
